

August 2006

**Harvest Initiation:
Setting Intention for the Autumnal Equinox
A Three Part Discourse**

It is never a question of [belief](#); the only scientific attitude one can take on any subject is whether it is true. The law of gravitation worked as efficiently before Newton as after him. The cosmos would be fairly chaotic if its laws could not operate without the sanction of human belief. ---- [Yuktswar](#)

We, the Many Masters, welcome you today as we discuss the intention, purpose and meaning of the Autumnal Equinox. We will discuss the overall theme of the Equinox: Harvest in the context of solar consciousness and with the tarot based themes of body-mind-spirit, and love-wisdom-power.

We will be examining and experiencing archetypal energies, and the movement of soul through conception (represented by the Virgin) and death/rebirth (represented by Transfiguration.) We will examine the trinities in two of the sacred numbers of 12 and 10. The resulting numerology of 22 is a Key to Ascension Consciousness, that which we have the opportunity to embrace, to create and to teach by example in every day of incarnate life. We invite you to enter onto this Path¹ of Expansion, In Joy.

PART I AUTUMNAL EQUINOX and GALACTIC CONSCIOUSNESS

We begin, under the direction of World Teacher Kuthumi, with this statement for you to consider:

Belief is nothing; Gnosis² is All.

The overall thematic energy of the Equinox in tarot and aura-soma are:

9 cups:

Bottle #42: Harvest; #51 Kuthumi

- **MANIFESTATION**
- **SATISFACTION**
- **SENSUAL PLEASURE**

- #42 – Spontaneity Combined with Joy
- #51 – Intellect in Search of Wisdom
- #93 – Collective Communication of Love-Wisdom

The Ascended Master Energy prevailing at Harvest, is Kuthumi, World Teacher on the Ray of Love and Wisdom.

As World Teacher, my I AM Presence shows you the meaning of Harvest:

har·vest³ *n.*

1. The act or process of gathering a crop.
2.
 - a. The crop that ripens or is gathered in a season.
 - b. The amount or measure of the crop gathered in a season.
 - c. The time or season of such gathering.
3. **The result or consequence of an activity.**

The harvest is a season of joy (Ps.126:1-6; Isa. 9:3).

To harvest is to gather, to reap, to collect, to return.

² Gnosis means “to know through direct experience.” It is knowledge through the heart rather than the mind.

³ Definitions from dictionary.com and <http://www.etymonline.com/>

[gather](#)

O.E. *gadrian*, *gædrian* "to gather, collect, store up," related to *gæd* "fellowship," and *god* "good," from P.Gmc. **gadurojan* "bring together, unite"

[reap](#)

"to cut grain with a hook or sickle," O.E. *reopan*, Mercian form of *ripan* "to reap," related to O.E. *ripe* "ripe" (see [ripe](#)). *Reaper* is O.E. *ripere*, in compound *hripemann*. Meaning "**personification of death**"

[collect](#)

1573 (trans.), from O.Fr. *collecter* (1371), from L. *collectus*, pp. of *colligere* "gather together," from *com-* "together" + *legere* "to gather." The intrans. sense is attested from 1794. *Collection* "group of things gathered together"

[return](#)

c.1366, "to come back," from O.Fr. *retorner* "turn back, return," from *re-* "back" + *torner* "to turn" (see [turn](#)). Transitive sense is attested from c.1420. The noun is first attested c.1390, "act of coming back;"

We are suggesting to you that the time of Harvest may be redefined. It has been universally understood to represent "reaping what you sow" – this is karmic belief without higher consciousness of your Free Will Choice. This is the return, the act of coming back, of all energies that you have set into motion in the winter, spring and summer. This is the old way of unconscious creation – doing what is expected without exercising your Divine Right to Ask, to Choose and to Manifest In Joy.

We will redefine the 2006 Harvest for you as this:

To bring together as a group, all that you have sown, moving in great clarity of Soul through the personification of Death, into the Light of Rebirth.

Harvest is the spiral of Conscious Creation into the Heart of the Divine.

Harvest is the Time of Dharmic⁴ Revival.

Before we move into the meaning of these redefinitions, let us look at the larger picture of your solar system and your galaxy. The collective awareness of the scientific "discovery" of three new planets is related to All that we will be harvesting at the Equinox. It is the return into collective consciousness of the sacred number of 12.

⁴ Dharma is to live and work from a spiritual basis, in accord with our inherent, spiritual nature. Every aspect of your life, including work, becomes an exercise in spiritual wisdom, devotion, and service. The Path of Dharma is the activity of making everything sacred and devoting your life to the Divine.

Astronomers decide on three new planets

1.01, Wed Aug 16 2006

Source: <http://www.itv.com/news/9721ad2a550e48cfbf71e95ba4b946f4.html>

An influential group of Astronomers meeting in Prague are deciding whether our solar system has 12 planets, not nine.

They have agreed on a draft proposal for redefining what constitutes a planet.

A new kind of planet, the pluton, differs from classical planets in that they have orbits round the Sun that take longer than 200 years to complete, and their orbits are highly tilted and non-circular.

All these characteristics suggest that they have an origin different from that of classical planets.

If plutons are approved at the meeting in the Czech capital, it would mean there are 12, not nine planets, and more could be added to the list in the future.

They include eight "classic" planets - Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune - three "plutons," (Pluto, Charon and Xena), and Ceres, the largest asteroid.

We will suggest further that the dozen "candidate planets" under observation at this time, will eventually become accepted as the full complement of 24 planets orbiting the Sun. Some of these planets are called: Sedna, Quaoar, Orcus, Varuna, Vesta, Hygeia, Pallas and Ixion.

Let us suggest that this "discovery" is a direct analogy of the macrocosm of your solar system to the microcosm of your incarnate body, also your soul-ar system. You have been aware for quite some time that the accepted belief system of chakras includes the 7 major chakras within the body, a soul star chakra just over the head and perhaps an earth star chakra below the feet. Several more chakras outside and above the head at varying "distances" away have likewise been suggested over time, numbering in the range of chakras 8-12, etc. These "higher chakras" have been quite elusive for many and have been largely inactive, as a result of the placement outside the body.

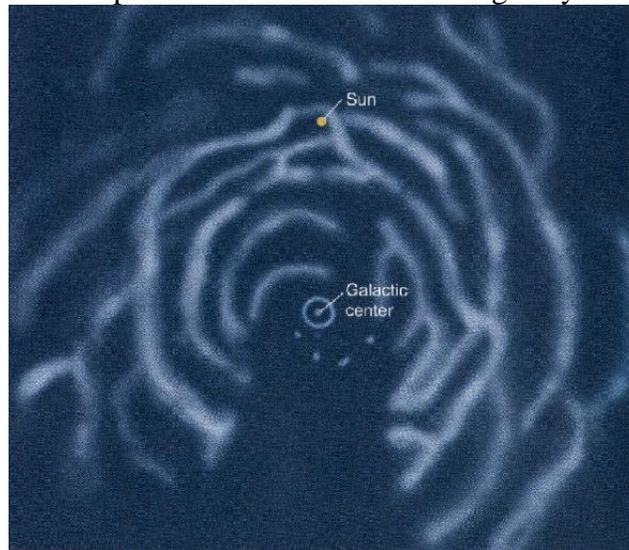

We have been teaching through many messengers over the last several years, that all 12 major chakras exist within the body, are part of your whole soul-ar system and are opening into the collective conscious as an integrated whole. These 12 major chakras which we will continue to balance and open during the Equinox, are now directly under your own conscious control as you expand your ability to Create your Reality at an integrated level of being. You will see how rapidly the *conceptualization* of your solar system from 8 classical planets and one "pluton" expands to 12 planets, and then to 24, showing you a macrocosm of reflection of your own Divine construction. ***This will not be without controversy***, for nothing of such magnitude ever is, and that alone, gives us an indication of the grandness of this consciousness shift for humanity. It heralds many things, among which is an awakening to other dimensional realities.

Now, let us proceed to the energetic opportunities available to all who are open to receive at the Autumnal Equinox.

The Autumnal Equinox

The Autumnal Equinox is the time of power, the time of realization of your path, the time of inner knowing. This is a time of Balance when day and night are equal in length all over Earth. *This powerful energetic period offers you the opportunity to become detached from the smallness of your mind and to activate your full soul consciousness.* From here, you then take responsibility for your creations by living in right relationship to all of natural world (whether “discovered” or “believed” to be true by scientists and skeptics). The premise for the Equinox experience, our dear friends, is that you make a choice to BE HERE and to BE HERE in consciousness of all of who you are. This means that rather than exit your physical body and seek spirit outside the manifest form, you make a conscious choice to incorporate (to bring into the body) all spiritual wisdom you have access to.

We thus begin by grounding into the physical body, into the earth star, into the core star of Gaia, and if we so choose, into the core of the perigalaction (the center of the Galaxy). Let us locate your place of operative consciousness in the galaxy:

Universal Consciousness and the Great Galactic Alignment

Current Scientific Belief about the Milky Way Galaxy:

- 🌍 Your astrophysical scientists have posited that the earth’s solar system is located on the Orion arm of the Milky Way Galaxy.
- 🌍 The Milky Way Galaxy is a barred spiral galaxy consisting of about 400 billion stars.
- 🌍 The main disk of the galaxy is about 100,000 light years across.
- 🌍 Your solar system is located about 26,000 light years from the center of the galaxy.

- The center of the galaxy is located near a star commonly called Sag A.
- For the earth's solar system to orbit around this galactic center, it takes about 225 to 230 million years (a Grand Orbit).

This 225+ million year period is what we call a “galactic age”. The last time your galaxy was in its current orbital position in relation to the perigalation, the dinosaurs “ruled” the earth, hence the reference to the latest galactic cycle as the Reptilian Age of Earth.

We suggest that over the last several million years, as the Milky Way Galaxy has moved through its Grand Orbit, the Earth has transitioned into the [Human Soul-ar Age of Universal Consciousness](#). Some of the Ancients foretold this time of mass human consciousness of the vastness of the Universe and the place of humanity within this vast scope of time-space.

To hold only Earth Consciousness in mind, gives you a limited understanding of the overall prominence of active, conscious intelligent life forms in the galaxy over this period of time. Within this vast 225+ million year cycle of “time” are many, many smaller cycles. Within the current human life cycle of approximately 80 years, what importance do cycles of 225 million years or 3 million years or 26,000 years or even 2,000 years have on your day to day life? On your choices? On how you will Serve? We posit that without knowing where you are in the scheme of reality, without knowing the **critical nature of alignment** of “above and below” occurring on a vast scale in the Now, it is difficult to know your own Self. This is precisely why we are beginning with a vaster scale than perhaps you have considered before today.

The Autumnal Equinox (Balanced day and night) is representative of a Great Galactic Alignment that we are moving towards over the next 6 years as we approach 2012. As in all celestial movements, the impact of this alignment is felt for periods of time both before and after the actual nanosecond of “time” in which the exact alignment occurs. In the case of the Great alignments, we will suggest that the impact is present 25 years both before and after the actual “event”. (i.e. from 1987 to 2037.) Have you not felt accelerated lately? Shifted? Different? Sometimes even confused? Perhaps if you Know what is occurring on a Universal scale, you will be able to incorporate these shifts with greater grace and ease.

Before we look at the Great Galactic Alignment, we must establish *the rotating macrocosmic units* we will be referring to. You are all aware that on a microcosmic level, energy is constructed by rotating particle matter. For example, electrons revolve around an atomic nucleus. On a much larger scale, planetary satellites also move in rotating patterns. The moon revolves around the earth. And the earth and planetary bodies (12 to 24!), of course, revolve around the Sun. The solar system, is the *first of three macrocosmic units* we will refer to.

The *second macrocosmic unit* we are interested in discussing today, is your solar system's rotation around what the Ancients have called the Great Central Sun. This is a bright star known as Alcyone. We suggest that Alcyone is not part of the Pleiades star

cluster – but is equidistant from your solar system and the Pleiades system. Your solar system and the Pleiades BOTH orbit the bright Star Alcyone in equidistant fashion. Thus, from the perspective of earth, it always appears that Alcyone is IN the Pleiades system. We are suggesting to you that Alcyone is the Center, or Pivot, or origin of your solar consciousness⁵. This is why it has been identified over and over, as the Great Central Sun. This co-equal orbit of your solar system which we will call Ra, completes one orbit around Alcyone every 24,000 to 26,000 years. This is what the ancients identify as a Precessional Cycle. Alcyone’s name reflects its cosmic service for it means “Center”, “Pivot”, “Heavenly Throne” and Al-Seeing-One. Alcyone is not the center of the entire galaxy, but a pivotal point of your local arm of solar systems, the Orion Arm.

Now, on an even larger scale of *the third macrocosmic unit*, the orbiting solar systems in the Orion Arm of the galaxy are also orbiting the perigalaction, (center of the galaxy), at a rate of 225 to 230 million years for one Grand Galactic Cycle. Your solar system’s location in the entire galaxy is seen in the graphic on page 5.

Now, we may proceed with the Alignments of a cosmic nature. During the Great Galactic Alignment, an alignment of planes occurs in three significant ways:

- 1) the earth’s equator aligns with the sun as it does twice every solar year (365 days) at the Equinoxes
- 2) the solar system aligns with the Equatorial Plane of the Great Central Sun – Alcyone, the pivotal point of your local solar system group, as it does twice every 24,000 to 26,000 years (this variance is due to oscillations⁶ of “time” – meaning time as you understand it, is not an absolute constant)
- 3) the local solar system group on the Orion Arm aligns with the Equatorial Plane of the Perigalaction – the very center of the Galaxy. This occurs twice every 225 to 230 million years (again the range is due to oscillations of “time”)⁷

This Great Galactic alignment is what the Mayan calendar has long foretold as occurring on 12-21-2012. Perhaps now, in the context of 225+ million years, you begin to understand why we refer to this critical period of time as the “nanosecond”.

The Precession of the Equinoxes relates to one complete Zodiacal Cycle. A complete zodiacal cycle consists of the movement of the earth through each of the zodiacal signs, a duration of 2,160 years for each of the 12 signs, thus 26,000 years.

⁵ I wish to give credit to the following source for assisting me in accessing this information:
<http://www.ohmsnotbombs.org/sporadicnews.php?articleID=17>

⁶ **Oscillation** is the [periodic](#) variation, typically in [time](#), of some measure as seen, for example, in a swinging [pendulum](#). (from: Wikipedia.)

⁷ The Earth’s Solar system is considered to be 20 light years “above” the Equatorial Plane of the Galaxy - However, since the Sun is about 26,000 light years from the galactic center, it is relatively speaking extremely close to the central plane. <http://www.seds.org/messier/more/mw.html>

In the Precession of the Equinoxes, a grand concept is illuminated: your solar system has passed into the Ascending Arc of Consciousness. The history of your world has faithfully portrayed the descending arc of consciousness from approximately 11,600 BCE to 1400 CE, a gradual descent from light into darkness. We remind you that 1400 ad is generally considered to be the dawning of the Renaissance (or Rebirth of Light) in modern history.

When your solar system begins its ascending movement back to the closest point in its orbit around the Great Central Sun, Spiritual Wisdom becomes accessible to All who seek. This is the great movement of the Precession. It is precisely at the Autumnal Equinox, with balance and alignment present energetically, that your ability to enter Gnosis, is the most powerful. And not only this! The entire galactic plane of consciousness is aligning with the Ra solar system (*your* solar system, our dear ones.). This occurs twice in 225+ million years. Each time you move through the Equinoxes , you are one slight degree closer to this nano-second alignment which is felt most strongly in 2012. Let us remind you that the Mayan calendar contains the denotation of the longest “period” of marked time. The Mayan long count calendar marks a period of an “*alatum*” which is an expanse of time representing 63 million years.⁸ Perhaps you wonder why these Ancient people were interested in this long count? That is another topic which we will address at another time.

The important thing we are conveying is that it is important for you, as spiritual seekers on the Path of Dharma, to understand where you are:

**You are at the transitional point of Ascending Consciousness,
Your solar system is now moving in its grand orbit back to the point
nearest the Great Central Sun.**

**Three macrocosmic units are entering Grand Alignment.
The activation point is at the Autumnal Equinox.**

We close this first part of the Equinox Discourse with the photo taken by the Hubble Telescope on 14-Aug-2006: **The latest photo from the Hubble Space Telescope, presented at the 2006 General Assembly of the International Astronomical Union in Prague this week, shows a star forming region in the Large Magellanic Cloud (LMC). This sharp image reveals a large number of low-mass infant stars coexisting with young massive stars.**

This is a Hubble Space Telescope image of one of the hundreds of star-forming stellar systems, called stellar associations, located 180,000 light-years away in the Large Magellanic Cloud (LMC). The LMC is the second closest known satellite galaxy of our Milky Way, orbiting it roughly every 1.5 billion years.

⁸ Mayan calendar reference: <http://www.kalarhythms.com/mayan/calendar.htm>

Image credit: NASA, ESA and D. A. Gouliermis (MPIA)

The importance of this photo is the energy of co-existence – it shows us this concept in the immeasurable beauty of the Universe: Large and small stars in harmonious coexistence.

- 🌍 You are part of this whole of conscious creation;
- 🌍 You co-exist with this brilliance;
- 🌍 This is inside of Your Sacred Soul.
- 🌍 It is yours for the Harvest.

Namaste,

Kuthumi

End of Part I.
