

2-11-2008

We welcome you on this day of 2-11, in the year of 1. ($2008 = 2+0+0+8=10=1$).

I am Sananda. On this day of 2-11-(1), my I AM Presence would like to make you aware that your science and technology is catching up to what many of you, as intuitive metaphysicians, have known for a long, long time. Many things of this nature will be occurring in the next few years as you open up to the Truth of who you are and how you are connected to the greater whole through the 1.

I have said to many, *There are no idle words. All words carry vibration and the vibration of words when aligned with the One, with Love, come from the Treasury of your Heart. Where is the Heart? At the center of your being.* (ref: Matthew 12:34-37) Whatever is in your heart, determines your vibration.

On 2-8-2008, my I AM Presence began to transmit a message on the topic of Spiritual Atonement to our messenger. It is entitled the Canon of Spiritual Atonement and will be released later this week. Through her work in numerology with the Master Kuthumi We have been referring, to the 111 grids, sometimes called the Crystal Grids of Trinity. We have also been teaching about the Light Network of Ascension. If you allow your intuitive mind and feeling heart to open to these two energies, you will inherently Know what they are.

First, we will show you the Confluence of these keys energetics with the 111 grids¹:

What is the importance of the 111 vibration and symbol? It is the connecting energy to the Heart center of all things: the 111 symbol² represents the inner awakening to balance of your own primary trinity of Love-Wisdom-Power. The 111 symbol is a sacred symbol of this reconnection in the inner most place of your soul: the God within. To reconnect with the God, or I AM Presence within, you must give yourselves permission to go into your own temple of Love-Wisdom-Power, represented by the number 111. Deep within your own heart, you find unity with the One. Deep within your heart, you experience Atonement.

² 111 Symbol from the Order of the Golden Dawn.

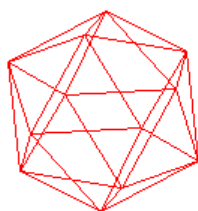

Christ: Love-Wisdom-Power = 111 =3

The Crystal Grids of Trinity are the energetic grids that connect all sacred places on earth to the heart (or core) of Gaia. They actually emanate from the Central Core Crystal and form a nested large icosahedron **and** a large dodecahedron, creating a sacred geometrical space-grid over the entire earth's surface.

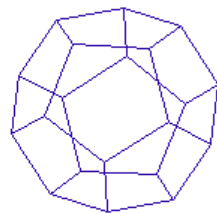

There is great symmetry to these two sacred geometrical forms:

The icosahedron has 20 faces which meet at 12 vertexes with 5- 3 sided faces to a vertex.
The dodecahedron has 12 faces which meet at 20 vertexes with 3-5 sided faces to a vertex

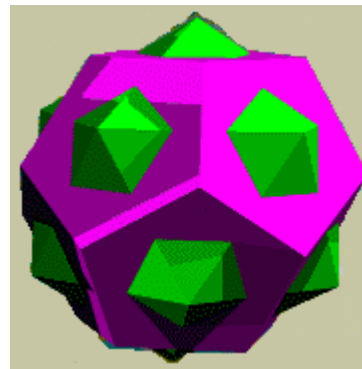

Icosa-dodeca COMBINED:

Icosa

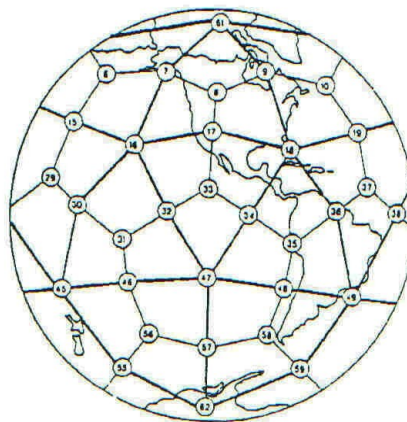

Dodeca

Each triangle projected onto the surface of the earth by the icosahedron, is a perfect equilateral triangle (90-90-90 degree angles). These triangles replicate over and over so that within each of the 20 large equilateral triangles, are millions of smaller equilateral triangles activated on Earth. The icosahedron combined form, above (green-purple) creates 120- ninety degree angles that envelope the earth, originally, in perfect symmetry.

Every sacred site on earth is located at an intersecting angle of the crystal trinity points. These are the Crystal Grids of Trinity.³

³ This is based on the Russian Grid system. Please refer to this website for more information:
<http://www.spiritofmaat.com/archive/nov2/thegrids.htm>

With the fall of Atlantis, the Crystal Grids of Trinity became imbalanced and off center in many places throughout the earth. When Atlantis fell, the crystal harmonizers on the surface of the earth and in underground locations lost most of their connections to the central core structure. This disconnection has impacted all life force on earth, including the structure of water and your physical biology⁴.

Since Harmonic Convergence in 1987, many Lightworkers have been waking up and are now assisting in the repair and restoration of the Crystal Grids of Trinity that were damaged in the fall of Atlantis 11,000-12,000 years ago⁵. Wherever you walk, wherever you send your conscious intention to heal on the Earth, you are creating a [healing wave vibration](#) which is restoring the Grids back to order. You are, by virtue of being here, assisting in the **reconnections** of the sacred geometries of Gaia, preparing for the planet's ascension, just as you are preparing for your own.

On 2-8-2008, the same day as our beginning transmission of the Canon of Spiritual Atonement began, an important announcement was published about the Crystal Core at the center of the earth:

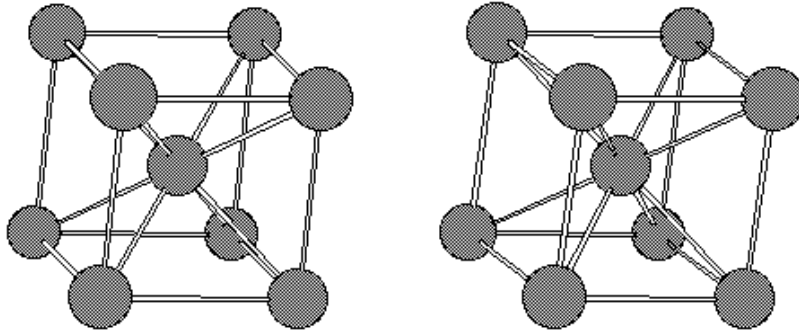

Computer simulations strongly support new theory of Earth's core [Published: 11:26 EST, February 08, 2008](#)

The earth's heat balance, like its magnetic field, is dependent on the amount of heat that is stored in the inner core of the earth. These conditions, in turn, are dependent on the [crystal structure of the iron in the inner core](#). Previously these estimates were based on models deriving from the hexagonal structure of iron in the inner core. Initially, in 2003, the (authors) published strong theoretical proof that the earth's core assumes the so-called [body-centered cubic crystal structure](#) at high temperatures - a structure that despite its high degree of symmetry evinces a surprisingly high level of elastic anisotropy, that is, its elastic properties are contingent on direction. This theory about the crystal structure directly contradicted the then prevailing view, but since then [the theory has found both experimental and theoretical support](#). The body-centered cubic crystal structure forms a cube with atoms in each corner and a further atom in the middle of this cube. It is oriented in such a way that its great diagonal is directed along the earth's axis of rotation, which [makes it possible for the iron to evince sound propagations](#) with the velocities observed. Read the entire article here: <http://www.physorg.com/news121692398.html>

In the **Body Centered Cubic** ("BCC") unit cell there is **one** host atom (lattice point) at each corner of the cube and one host atom in the center of the cube. Each corner atom touches the central atom along the body diagonal of the cube.

⁴ (Note: water is 71% of earth's surface and about 70% of non-adipose physical body tissue – adipose or fat tissue contains about only 10% water – increasing obesity is related in part to poor immune function and lifeless ingested water). Many people are repairing the water and are providing vibrationally restored and whole water products. Dr. Joseph Harbosky at Reflections of Life Clinic is at the forefront of this movement with his Good Vibrations water. His website is: <http://www.goodvibrationswater.com/>

Why is this important? Because finally, your science has caught up, through super-computers, to what you already know: there is a giant body-centered cubic crystalline structure at the center of earth with one central host atom, which is emanating great power throughout the earth. (The study's calculations were carried out using the most powerful parallel supercomputers in existence.) Prior to the release of this study, the prevailing view was that the bcc form was too unstable due to its symmetry, to exist at high temperature at the core of the earth. Scientists posited that the core crystal was made up of a hexagonal crystal forms, a 7 pointed form without a central atom which they assumed would be stable under high temperatures.

The exciting part of this discovery for our purposes is that the earth core is based on a symmetrical form with One atom at the very center. The earth in its ascension process is realigning and reconnecting to the symmetrical grids all connecting into the one atom at the core, the Heart of Gaia. The core emits symmetrical sound propagations, and is attempting to re-connect all sacred places and resonating into the core of every atomic particle on earth, including you! What has been scientifically speculated upon, is now “strongly supported”.

You may notice that six, four-sided pyramids in the BCC are formed with the one central atom at the apex of each one. This sacred pyramid form has been replicated by ancient civilizations over and over throughout the globe as part of their innate connection to the earth's core. The pyramids and Egypt and of Central America are amplifying the core resonance at the junctures of the equilateral triangles on the surface of the earth. Among many purposes these pyramids serve, is to reconnect the Crystal Grids to the central core.

On a microcosmic level, you also understand that you contain these crystal grids of trinity within your body. How do we “know” this? It can be researched and “strongly supported” that the golden ratio or Phi, which is contained within the each of the five Platonic solids (the [cube](#), [dodecahedron](#), [icosahedron](#), [octahedron](#), and [tetrahedron](#),) is the same proportion used to construct your physical body:

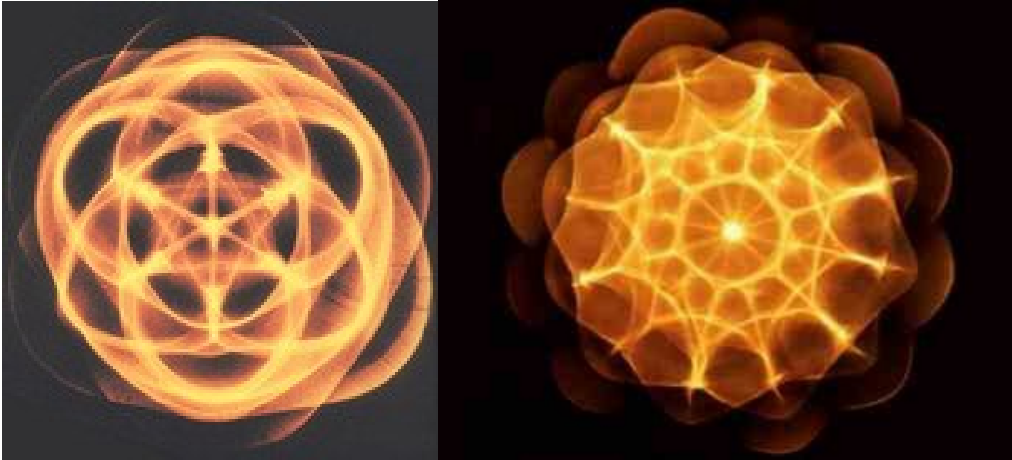

You feel the sacred trinity matrix within you and know that there is much more to your being than biology. Your subtle anatomy connects to your physical anatomy by what we call the Light Network of Ascension.

**The Light Network of Ascension or LNA is the bridge between your two strand DNA and your 12 strand illuminated DNA.
It creates the re-connections between your physical and subtle bodies.**

The 12 strand illuminated DNA is the LNA connection to all of your subtle anatomy. Healing and repairing your own LNA grids is preparing you for your own Ascension process. As this occurs, your light body is becoming more fully activated and more visible. Your biology is experiencing accelerations and attunements to reconnect the LNA-DNA matrix. You may be experiencing this in many ways, the expression of disease or the seeming break-down of some of your biological senses, most specifically vision and hearing.

Why would this process result in discomfort or deterioration? Because to reconnect that which has been disconnected, your biology is throwing off the vestiges of old limitations and opening to higher frequency perceptions, such as clairvoyance, clairsentience, and clairaudience. In some of you, your 3D sensory vision is diminishing not so much with physical age anymore, but with improved higher mind vision. You are seeing the structure behind form, the form in structure and the subtle presence of connection in all things.

Cymatics experiments icosahedron on the left, star tetrahedron on the right⁶

You are reconnecting your crystal grids of trinity into the center of your being. Gaia is reconnecting her crystal grids of trinity into the center of her crystal core. The center of all things is the Heart. The creation energy behind all things, is Love. It is not “thought”, it is Love.

All words carry vibration. When you align with Love you are reconnecting your LNA-DNA to the central core-heart of Gaia. Gaia is propagating vibrational alignments into the earth and aligning with the Universal Heart on a much vaster, infinite 111 Grid of All.

You are becoming whole again. You are becoming a light-filled and love-centered being. This is the *Light Body Reconnection*. The center is where *We touch the beauty of our souls*. This is where *We align our hearts in Love*. This is *The Way, the Truth, The Light*. How does one affirm this to the core of the I AM? *“I Trust Love’s True Vibration”*.

⁶ In the fifties Dr. Hans Jenny demonstrated with his Cymatics experiments using simple sound waves that all of the Platonic Solids emerge as standing wave interference patterns in spherical volumes. The Platonic Solids are the blueprint for the self organising universe. The implosion is simply a set of these nested or fractal Platonic solids as wave interference patterns.

This is the reason why geometric forms like the Platonic Solids are able to resonate with the energies of the universe. Russian science calls them passive torsion field generators. This is the secret of the Great Pyramid of Giza that is actually half an octahedron and is able to resonate with the torsion fields of the Earth. The Earth’s electromagnetic energy matrix, called the Earth grid consists completely of these nested Platonic Solids. The Platonic Solid energy grids of the atom simply locks into the larger Platonic Solids of the energy grid of the Earth, which in term locks in the energy matrix of the dodecahedral zodiac and the **dodecahedral energy grid of the universe at large** (from the latest Hubble space telescope observations). This makes up the matrix of our physical reality.
